GRAB protein and peptides derived from it are used in vaccine compositions for generating a protective immune response against group A Streptococcus. Antibodies against GRAB are useful for treating Streptococcus pyogenes infections. The protein is also useful for purifying alpha2M from a sample. The present sequence is a DNA encoding full-length GRAB protein from S. pyogenes strain SF370.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Claim

GRAB protein and peptides derived from it are used in vaccine compositions for generating a protective immune response against group A Streptococcus, Antibodies against GRAB are useful for treating Streptococcus pyogenes infections. The protein is also useful for purifying alpha2M from a sample. The present sequence is a DNA encoding full-length GRAB protein from S. pyogenes strain SF370.

                                                                                                                                                                                                                                                                                                                                                                                                     immune response against group A Streptococcus. Antibodies against GRAB are useful for treating Streptococcus pyogenes infections. The protein is also useful for purifying alpha2M from a sample. The present sequencis a DNA encoding partial GRAB protein from S. pyogenes strain KTLJ. The protein has alpha2M binding region and is useful in vaccine
                                                                                                                                                                                                                                                                                                                                                                                                                                                    related alpha2M binding protein) from Streptococcus pyogenes which has the ability to bind alpha2-macroglobulin (alpha2M) and show homology protein G of group G Streptococcus. GRAB protein and peptides derived from it are used in vaccine compositions for generating a protective

                                                                                                                                                                                 The patent discloses a new family of proteins termed GRAB (protein Greiated alpha2M binding protein) from Streptococcus pyogenes which have the ability to bind alpha2-macroglobulin (alpha2M) and show homology to protein G of group G Streptococcus. GRAB protein and peptides derived from it are used in vaccine compositions for generating a protective immune response against group A Streptococcus. Antibodies against GRAB are useful for treating Streptococcus progenes infections. The protein is also useful for purifying alpha2M from a sample. The present sequence is a DNA encoding partial GRAB protein from S. pyogenes strain API.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   CDS

GRAB protein and peptides derived from it are used in vaccine compositions for generating a protective immune response against group A Streptococcus. Antibodies against GRAB are useful for treating Streptococcus pyogenes infections. The protein is also useful for purifying alpha2M from a sample. The present sequence is a DNA encoding partial GRAB protein from S. pyogenes strain AP49. The protein has alpha2M binding region and is useful in vaccine
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Sequence 853

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             밁
                                                                             related alpha2M binding protein) from Streptococcus pyogenes which have the ability to bind alpha2-macroglobulin (alpha2M) and show homology to protein G of group G Streptococcus. GRAB protein and peptides derived from it are used in vaccine compositions for generating a protective immune response against group A Streptococcus. Antibodies against GRAB are useful for treating Streptococcus pyogenes infections. The protein is also useful for purifying alpha2M from a sample. The present sequencis a DNA encoding partial GRAB protein from S. pyogenes strain KTL9. The protein has alpha2M binding region and is useful in vaccine
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        GRAB protein;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                AAD00561
